FAITH WANJIRU

Graduate Civil & Structural Engineer

faith.wanjiru@example.com | linkedin.com/in/faith-wanjiru | Kenya

Civil & Structural Engineering graduate focused on structural design, construction and sustainable infrastructure - with academic and practical exposure to structural analysis, reinforced concrete design, geotechnics, surveying and construction technology.

EDUCATION

B.Eng. Civil & Structural Engineering 2021 - 2026

Moi University · School of Engineering · Eldoret, Kenya

Key coursework: structural analysis · reinforced concrete design · steel structures · soil mechanics · foundation engineering · highway & transportation engineering · hydraulics & hydrology · construction technology & management · engineering surveying · engineering economics.

INDUSTRIAL ATTACHMENT

Civil Engineering Intern (Industrial Attachment) — [Company placeholder] · Site / Construction Engineering · May-Aug 2025 [ph]

+ Assisted engineers with site inspections; read architectural and structural drawings.
+ Observed reinforcement fixing, formwork inspection and concrete placing/vibration/curing.
+ Supported measurement and quantity checks; recorded daily site activities and progress notes.
+ Participated in levelling and setting-out activities and toolbox / safety meetings.
+ Helped organize material test results; learned how RFIs and drawing clarifications are handled.

KEY PROJECTS

Structural Design & Performance Assessment of a Multi-Storey RC Building — Final-year project · 2026 · ETABS / AutoCAD / Excel

Complete design flow: grid layout, load assessment, analysis model with manual verification checks, member design (slabs, beams, columns, isolated footings), serviceability and reinforcement detailing.

Preliminary Highway Geometric Design — Academic project · 2025 · Civil 3D / AutoCAD / Excel

Road alignment between control points balancing geometric standards, terrain and earthworks; plan, profile, cross-sections and drainage considerations.

Geotechnical Site Assessment & Soil Classification — Laboratory / field project · 2024 · Excel

Sampling, moisture content, sieve analysis, Atterberg limits and Proctor compaction, interpreted into foundation-relevant classification and commentary.

Stormwater Drainage Design — Academic project · 2025 · AutoCAD / Excel / QGIS

Catchment delineation, rational-method peak flows, Manning-based drain sizing with self-cleansing velocity checks, profile and outlet arrangement.

TECHNICAL SKILLS

Structural: free-body diagrams · load paths · SFD/BMD · deflection concepts · indeterminate structures (working knowledge)
Reinforced concrete: beam / slab / column / footing design · detailing · durability (working knowledge)
Steel: tension & compression members · beam design · buckling concepts (working knowledge)
Geotechnical: classification · Atterberg limits · compaction · shear strength · bearing capacity (working knowledge)
Construction: drawing interpretation · site measurements · concrete works · sequencing · QC · safety awareness
Surveying: levelling · traversing · topographic surveying · setting out (field exposure)

SOFTWARE

Strong: AutoCAD · Microsoft Excel **Working knowledge:** ETABS · SAP2000 · Revit Structure · Civil 3D · Microsoft Project **Academic exposure:** STAAD.Pro · MATLAB · Python · QGIS · Primavera P6

PROFESSIONAL DEVELOPMENT

Advanced ETABS modelling · RC detailing · Eurocode design · Revit Structure · BIM coordination · quantity take-off · embodied carbon in structures · Python / Excel automation.

CODES & STANDARDS (ACADEMIC EXPOSURE)

EN 1990 / 1991 / 1992 / 1993 / 1997 · BS 8110 (coursework) · Kenya road design manuals (where applicable). Academic exposure only - not professional authorization.
